

CLICS MOOCs

Massive Open Online Courses (MOOCs)

MOOCs are a modern educational instrument with which large audiences all over the world can be reached. MOOCs make use of modern technologies, enabling interested students and audiences to go through this class remotely.

Our MOOCs contain practical Exercises, in the form of lab work as it is often found in computer science degree programs.

Machine Translation MOOC

This MOOC explains the basic principles of machine translation. Machine translation is the task of translating from one natural language to another natural language. Therefore, these algorithms can help people communicate in different languages. Such algorithms are used in common applications, from Google Translate to apps on your mobile device.
