CLICS

Continuous Learning in International Collaborative Studies

Project director: Prof. Alex Waibel

Program line: Thematic Network

Project title: CLICS – Continuous Learning in International Collaborative Studies

Partners: Karlsruhe Institute of Technology, Carnegie Mellon University, Nara Institute of Science and Technology, Waseda University, Hong Kong University of Science and Technology

Partner Countries: USA, Japan, Hong Kong

Model/Structure: Utilization of the vital cooperation „interACT“, as well as a selection of the leading institutions worldwide in the CLICS relevant academic disciplines.

Strategy: Further development of an intensive network in order to create a joint and innovative tool for teaching.

Project aims: Development of three international „Massive Open Online Courses“(MOOCs) in the field of speech and robotic, and their automatic translation into various languages. The MOOCs are supposed to be integrated into the Universities' lecture.

Measures: Development of the MOOCs, accompanied by student exchange, summer schools, workshops and distinguished lectures will strengthen the collaboration between the partners.

Special Features: Development of common and international MOOCs in an up to now uncovered sector and their automatic translation into different languages, so that MOOCs will be accessible to a wide audience.
